

BENGUELA GLOBAL EQUITY 27FOUR FEEDER FUND-A1

MINIMUM DISCLOSURE DOCUMENT

FUND OBJECTIVE AND INVESTMENT STRATEGY

To deliver above-average capital growth when compared to the Benchmark (including income) over the long-term through investment primarily in equity and equity related securities, which are listed on global recognised exchanges. The portfolio is a feeder fund, which is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges, and which could result in a higher fee structure for the feeder fund. The majority of the fund's investments are made through a master fund – the Benguela Global Equity UCITS Fund. The master fund is permitted to invest in listed and unlisted financial instruments in line with the conditions as determined by legislation from time to time. The portfolio managers invest using a Quality investment style to select stocks that offer the highest risk-adjusted returns over the long term.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

RISK INDICATOR

| ANNUALISED PERFORMANCE (%) | | | | RISK AND FUND STATS | | |
|----------------------------|---------|-----------|---------------|------------------------|---------|---------|
| | Fund | Benchmark | Active Return | Since inception (p.a.) | | |
| Since Incep. | 56.69% | 81.91% | -25.22% | Alpha | -3.94% | |
| Since Incep. Annualised | 11.07% | 15.01% | -3.93% | Sharpe Ratio | 0.42 | 0.66 |
| 1 year | 10.14% | 17.35% | -7.21% | Standard Deviation | 13.21% | 16.00% |
| 2 years | 19.04% | 22.70% | -3.67% | Max Drawdown | -15.84% | -18.12% |
| 3 years | 13.32% | 16.80% | -3.47% | Max Monthly Gain | 10.62% | 13.84% |
| Highest rolling 1 year | 32.04% | 34.33% | -2.29% | % Positive Months | 61.54% | 57.69% |
| Lowest rolling 1 year | -11.68% | -13.05% | 1.37% | | | |

31 March 2024 - 0 cpu

BENGUELA GLOBAL EQUITY 27FOUR FEEDER FUND-A1

GLOSSARY

Annualised Performance: Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest Performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Alpha: Denotes the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Max Gain: Largest increase in any single month.

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

FUND SPECIFIC RISK

Default Risk: The risk that the issuers of fixed income instruments may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

% Property Risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Geographic / Sector Risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity Risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity Investment Risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by 27four Collective Investments by or before 1pm (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time 27four Collective Investments shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the 27four Collective Investments website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.benguelaglobal.com

NB: Portfolio performance figures are calculated for the relevant class of the portfolio
