

ABOUT THE FUND

BENGUELA GLOBAL EQUITY FUND - C

MINIMUM DISCLOSURE DOCUMENT & GENERAL INVESTOR REPORT

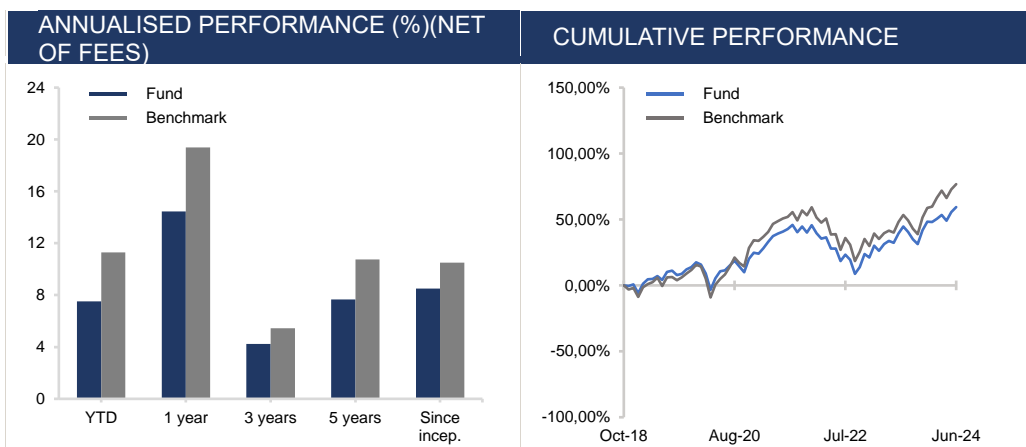

PORTFOLIO INVESTMENT STRATEGY

The Global Equity UCITS Portfolio seeks to deliver long-term capital growth that is superior to its benchmark, the MSCI All Country World Index ("MSCI ACWI"). The Fund invests with a Quality style and the portfolio managers aim to select stocks that offer the highest intrinsic valuation upside relative to their quality as measured through our proprietary Benguela Quality Score. The portfolio was transitioned to the Ireland UCITS structure during October 2018.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

RISK INDICATOR

FUND COMMENTARY

The Portfolio has followed and complied with its policy objective.

The Benguela Global Equity UCIT Fund (BGEUF) showcased commendable performance for the quarter ended 30 June 2024, recording a robust return of 4.08%, significantly surpassing the benchmark return of 2.87%. This solid achievement was realized despite a volatile quarter marked by the growing irrational exuberance surrounding stocks associated with artificial intelligence. This strategic outperformance serves as a pivotal step towards narrowing our relative performance backlog of 0.4% p.a. accumulated over the past three years. This relative performance backlog has predominantly been a result of our steadfast commitment to a proven, meticulous, and risk-conscious investment approach, rather than succumbing to the temptation of chasing short-term relative performance driven by growing irrational exuberance surrounding stocks linked to artificial intelligence.

The US Technology, Media, and Telecom (TMT) sector's trillion-dollar market cap race appears increasingly disconnected from economic reality. Driven by investor euphoria and speculative fervor, these towering valuations often overshadow the grounded performance metrics and realistic growth prospects of the companies involved. While technological innovation and market leadership justify some premium, the exuberance reflected in these market caps may not be fully sustainable, especially when juxtaposed against broader economic indicators such as GDP growth, consumer spending, and income levels. For example, at the current Nvidia market capitalisation is now bigger than the individual market value of both the entire UK and German stock markets. Ditto for Microsoft and Apple. This misalignment suggests that the market's lofty expectations could be outpacing the fundamental economic contributions of the TMT sector, setting the stage for potential recalibrations as rationality reasserts itself in equity valuations. The BGEUF's disciplined strategy, grounded in long-term value creation, continues to demonstrate its efficacy, reinforcing our unwavering confidence in the fund's enduring potential and resilience in the face of market volatility. We remain confident about the efficacy of our investment approach and its potential to deliver sustained value-add to investors in a complete market cycle.

Below are the quarterly asset allocation changes:

	Q1 2024	Q2 2024	Change
Equity	97.79%	97.43%	-0.36%
Property	-	-	-
Cash	2.21%	2.57%	+0.36%

Portfolio Outlook

Benguela Global Fund Managers is confident in its ability to add significant value to client portfolios through its proprietary calibrated quality strategy in global markets. Empirical findings strongly support the efficacy of our quality strategy in delivering superior investment outcomes within global equities. Studies indicate that high-quality companies—those with strong balance sheets, stable earnings, and low debt—consistently outperform their lower-quality counterparts over the long term. These companies tend to exhibit lower volatility and higher resilience during market downturns, contributing to more stable investment returns.

Our strategy is meticulously designed to minimize various risks, including business risk, financial risk, ESG risk, growth risk, and execution risk in investee companies. Additionally, our focus on ESG criteria further enhances risk management, as companies with strong ESG practices tend to face fewer regulatory hurdles, lower operational risks, and benefit from a positive public perception. By focusing on these key risk factors and maintaining strict discipline in selecting attractively priced stocks in global markets, we believe that our quality strategy can deliver superior investment outcomes for our clients. Our adherence to strict valuation metrics, we avoid overpaying for growth and protect our portfolios from market exuberance. We believe that our meticulous focus on minimizing various forms of risk, coupled with our valuation discipline, bolsters our confidence in the ability of Benguela Global Fund Managers to continue adding value to client portfolios in an ever-evolving global market landscape.

BENGUELA GLOBAL EQUITY FUND - C

GLOSSARY

Annualised Performance: Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest Performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Alpha: Denotes the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Max Gain: Largest increase in any single month.

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

FUND SPECIFIC RISK

Default Risk: The risk that the issuers of fixed income instruments may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

% Property Risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Geographic / Sector Risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity Risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity Investment Risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

INFORMATION DISCLOSURE

The portfolio has adhered to its policy objective and there were no material changes to the composition of the portfolio during the quarter.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not a reliable guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. Prices are published daily and are available on the Prescient Global Funds website. For any additional information such as fund prices, brochures and application forms please go to www.benguelaglobal.com

Given the inclusion of foreign securities in the portfolio, there may be periodic constraints on liquidity as well as the repatriation of funds, caused by macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments with the understanding that there are no guarantees. Furthermore, kindly note that all documents, notifications of deposits, investment, redemption and switch applications must be received by Prescient Fund Services (Ireland) Limited before 10:00am (Irish time) and will be transacted at the net asset value price of the day. Where all required documentation is not received before the stated cut off time, neither Benguela Global Fund Managers nor Prescient Fund Services (Ireland) shall be obliged to transact at the net asset value price as agreed to. The fund is priced at 5pm (New York Time). For any additional information on Benguela's investment approach, and for our full prospectus and KIID (both in English) which are free of charge, kindly contact Benguela Global Fund Managers or go to www.benguelaglobal.com.

The Benguela Global Equity Fund is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002.
